CAPEC Vulnerability + ID	Typical Likelihood of Exploit	Typical Severity	Probability distribution
1) SQL Injection 66	Very High	High	
2) OS Command Injection 68	High	High	
3) Buffer Overflow 100	High	Very High	
4) Server Side Include Injection 101	Very High	High	
5) Embedding Script (XSS) in HTTP Headers 86	High	Very High	
6) Exploitation of Session Variables, Resources IDs and other Trusted Credential 21	High	High	
7) Reflection Attack in Authentication Protocol 90	High	High	
8) DNS Cache Poisoning 142	High	High	
Phishing 98	High	Very High
